[Meetings]

2/5 Finish sprint planning and assign user stories
2/9 Learn how sublime text, terminal and local host function together with React. Helped each other to install the necessary packages in our machine as React is very tricky for us.
2/13 Solve problems that we face together for issues such as if one of us has problem committing or debugging.
2/17 Start combining our work together for preparation of sprint 1 submission

[Individual Goals]

Romil: Finish user story 8 and 10

Anvi: Work on branch visualization.

Niharika: Make test cases and begin working with Unity/shifting towards front-end. Finish user story #12,#13

Jia: Finish database for creating polls, updating polls and deleting polls

Tanya: Research about React and finish user story #6.
